

We stand for

**ACCURACY.**

The most accurate weighing system in the bagging industry

MSX: Specifically designed for the bagging process, ensuring maximum accuracy at high bagging speeds.

**PERFORMANCE.**

Optimize the performance of your production line

We design and manufacture high-performance bagging lines for the world's leading companies.

**CONTROL.**

Full production control at your fingertips

The new all-in-one digital solution, Pulsar, for advanced production management and service.

Global presence

**50+**  
years' experience

**80+**  
countries with PAYPER projects installed

**PAYPER**

Your trusted partner for bagging lines.

PAYPER designs and manufactures next-generation packaging lines for bulk solids: turn-key projects including dosing, weighing, bagging, palletizing and wrapping.

# Why choose us

**1**

The most accurate weighing systems in the bagging industry

- In-house technology specifically designed for bagging processes
- Accredited by official metrology institutions
- Lab equipment accuracy

**2**

Exhaustive knowledge of the industry

- Great knowledge of the properties of bulk solids
- A product test area measuring 800 m<sup>2</sup>, fitted out to emulate real-life conditions
- Extensive experience in multiple industries

**3**

Comprehensive tailor-made solutions

- Complete layout from the very beginning
- Ongoing project monitoring and optimal communication
- Full-line assembly and test run

**4**

First-class technical service

- **Team of 50+** dedicated service engineers
- Pulsar, our digital solution for advanced service management
- Quick response through our **24/7 customer service**

**5**

Trusted by the world's leading enterprises

- We only use components from internationally recognized brands
- Leading engineering companies trust us
- 5,000+ projects delivered around the world

## Complete solutions, from dosing to pallet protection

<p><b>Dosing &amp; Weighing</b></p> <p>Highly accurate dosing and weighing systems. In-house technology specifically designed for bagging processes.</p>	<p><b>Bagging</b></p> <p>High-performance bag-filling machines for open-mouth bags, valve bags, tubular FFS bags and bulk bags.</p>	<p><b>Palletizing</b></p> <p>From single gripper head robots to high-output conventional systems. Reliable bag palletizers for any production capacity.</p>	<p><b>Pallet hooding &amp; wrapping</b></p> <p>End-of-line solutions for maximum pallet stabilization and protection during transport and storage.</p>
