

YORKSHIRE PACKAGING SYSTEMS

THE COMPLETE SOLUTION

WE ARE YPS.

WORLD-LEADING SOLUTIONS TO MEET EVERY WRAPPING REQUIREMENT.

It's critical that you choose an ideal packaging solution for your business. Settle for an inadequate solution and risk damage to your packs during transit or a lacklustre finish on the store shelves. Or purchase an unreliable, ill-performing machine with hard-to-source parts and poor levels of support, and the disruption to your production can have dire consequences on your success.

However, now you need look no further. YPS are the UK's **most trusted supplier** of high-quality, robust wrapping solutions and whether the goal of your packaging is to **present or protect your goods**, we'll make it a reality.

What's more, we package up our industry-leading products with long-term support, expert knowledge and incredible customer service. **Welcome to YPS.**

SOLUTIONS WE CAN SUPPLY:

Shrink wrappers

Shrink films

Stretch wrappers

Stretch films

E-commerce packaging

Ancillary equipment

HOW WE STAND OUT FROM THE PACK...

We can't get straight to the tech specs of our products without highlighting the core values, services and company USPs that we think make YPS a great packaging partner of choice.

After all, it's our attributes as a company, along with our products, that means over half of our annual machinery sales come from returning customers and why our longest-running film account still trusts nobody else after more than 20 years of working with us.

We put this down to our philosophy that the installation of a packaging system should not be the end of a transaction, but rather the beginning of a relationship. That relationship will support you for the lifetime of the wrapping operation with consumables, service, expertise and value.

Join the thousands of successful businesses who've chosen YPS and see for yourself why we're the UK's favourite wrapping experts

So why choose us?

- ✓ A complete offering of machinery, film, spares and service
- ✓ BRC certified to the highest 'AA' standard
- ✓ SafeContractor accredited
- ✓ OPRL approved flexible films
- ✓ World-leading manufacturing sites
- ✓ Committed to sustainable solutions
- ✓ Fast, efficient deliveries of film and parts
- ✓ 24/7 technical support
- ✓ Winners of multiple customer service awards
- ✓ Thousands of satisfied customers
- ✓ Over four decades of expert experience

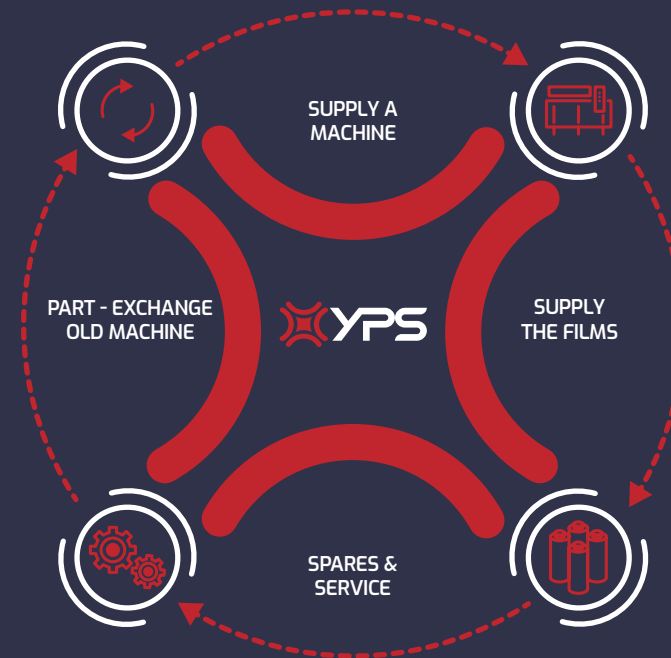

AN END-TO-END SERVICE...

For the complete solution.

We believe in comprehensive solutions that deliver an integrated, harmonised, 360° approach to your packaging operation:

- Once we've installed your machine, we'll supply a suitable specification, width and thickness of **flexible film** to produce the best possible results for your packs.
- A **service contract comes as standard** with each machine to offer a tailored schedule of preventative maintenance delivered by our experienced engineers, as well as thorough **operator training**.
- Our workshop is well stocked with **standard and specialist parts** for each model that we can ship across the UK, typically with just a 24 hour turnaround.
- At the end of any machine's useful life we will happily **part-exchange** it for a straight replacement model or an upgraded system to offer you a more economical route to uninterrupted wrapping.
- We're always happy to carry out a **comprehensive packaging audit** where we can offer advice for any complementary equipment, fine-tune the settings on your existing lines or trial new products.

It's this dedication to a total solution approach that makes us the only supplier in our industry able to offer a complete, future-proofed, one-stop-shop service for wrapping equipment and its associated products and services.

LEADING THE WAY IN SUSTAINABLE PACKAGING

Machinery, materials and services for a greener planet.

At YPS, we are dedicated to minimising the environmental impact of our products and our business. Read below for some examples and ask your YPS contact to tell you more.

Sustainable Materials:

Flexible plastics boast a whole range of planet-friendly attributes, including being lightweight, easily and widely recycled, void avoiding and food-preserving. And yet we're determined to make it better still.

We believe that conformance to a closed-loop model of packaging using recyclable and recycled plastic containing films is the most sustainable way to protect our planet. Every material we supply is **100% recyclable**. We also supply an ever-growing range of **recycled content material**, that is Plastic Packaging Tax exempt.

Furthermore, our ultra-thin films and extreme stretch pallet wrap provide the same or better performance with **lower material consumption**.

Machinery driving greener production:

It's not just our materials that can contribute to a sustainable wrapping operation. Several of our horizontal bagging machines **run papers** for those seeking to make a switch away from plastic packaging. Plus, many models in our range are specially designed to create **very tight packs** for reduced material consumption.

Our continuous motion machines offer increased control over the wrapping process significantly **reducing material wastage**, which can lower film use in production by as much as 35%.

SUSTAINABLE SERVICES WE PROVIDE:

Free baling machine scheme

Recyclable materials

Sustainable site survey

Downgauging mission

SHRINK WRAPPING SOLUTIONS

Machinery and films for display and transit applications.

Suited to an almost endless array of industries and products, shrink wrapping is one of the most versatile commercial packaging methods available, delivering a low-cost-per-pack, lightweight, fully recyclable and well-protected result for singles and multipacks.

Machinery:

When it comes to machinery, whatever your exact application, factory layout, speed requirements or operator capacity, we have the know-how to deliver your ideal automated shrink wrapping system.

Manual or fully automatic, inline or side feed, L sealer or side sealers, single or double chamber tunnels, our range can match **any collation, speed or capacity demand**.

Specialist applications can be accommodated such as dairy environments, aerosol wrapping and extra wide specifications. With a host of ancillary equipment also available, as well as the option to tune our equipment into any up or downstream machinery, a **turnkey shrinking solution** is truly possible with YPS.

Every machine comes with a **service contract** to keep you running at peak performance and a comprehensive parts and labour warranty.

Shrink Film:

We can supply the ideal film for your products and requirements, whether that's for impressive aesthetics, printed branding, puncture-resistance, tamper evidence, food-contact safety or 'greener' credentials.

For **display applications**, we offer a vast array of polyolefins with unique features and benefits to package almost any food or non-food product. Ultra-thin, bio-sourced, barrier, cross-linked, printed, anti-fog, breathable, lidding and 'second skin' shrink films enable us to cater for **any desired look and feel** as well as **any technical requirement**.

Transit applications are well served by our UK-manufactured polythene film range. In a choice of single-wound and centrefold widths, any thickness from 23mu up to 125mu and beyond is available for a **robust and durable** shrink material solution.

The entire collection is **100% recyclable** whilst a growing segment of the portfolio is now available with a minimum of 30% recycled content included in its formulation, rendering it **plastic tax exempt**.

Key Benefits :

- Robust and reliable machinery to suit both display and transit applications
- Specialist extra wide, stainless steel and aerosol-compliant systems
- Fully recyclable polyolefin and polythene films for next day delivery
- BRC approved films from manufacture through to storage and distribution
- Convenient call-off order facility for stable and secure film supply
- Baling machine service for film waste recycling
- Included service contract with every machine

STRETCH WRAPPING SOLUTIONS

Wrap pallets for storage or transit with our machinery & films.

Automating the wrapping process prevents slips, trips, strains and injury to your workforce, reduces film consumption, ensures compliance with cargo safety directives and increases load security and integrity.

Pallet wrapping machines can be either the perfect stand-alone solution or an end-of-line addition, offering a fast return on investment when coupled with a high-quality, high-yield stretch film.

Machinery:

Our fully and semi automatic stretch wrapping machines are available in **an array of configurations** to accommodate any operator capacity, footprint requirement, speed and pallet dimension.

Choose from turntables, robots, rotating arms, orbitals and rotating ring styles, with ancillary equipment also available for bespoke requirements. There are even options for extra wide formats or to withstand low temperatures or damp external environments.

Boasting a number of intelligent features, our automated machines make wrapping a breeze with the ability to store parameters, pallet configurations, wrapping cycles, production statistics and more in an intuitive touchscreen HMI.

Stretch Film:

YPS can supply a **diverse portfolio of films**, from standard hand wraps through to advanced machine films with **stretch ratios as high as 300%**. All specifications are available in a wide variety of widths, microns and colours.

We are proud distributors of a premium collection of stretch films which are known not only for their exceptional quality but also for their **award-winning sustainability credentials**. With a focus on downgauged films, carbon neutrality and innovative bio-based materials, all our stretch films deliver the greenest solution possible with the guarantee of 100% recyclability to boot.

Furthermore, we are able to offer stretch films with 30%+ recycled content to meet circular economy goals. So whatever your pallet wrapping operation demands, whether for a multi-purpose all-rounder or a bespoke breathable, pre-stretched or extreme stretch film, YPS has a solution to suit you.

Key Benefits :

- Fully and semi automatic stretch wrappers built with a low maintenance philosophy
- Strategic film roping, stretching and tensioning systems to create perfectly wrapped pallets
- Optional R-CONNECT app integration for remote assistance and performance information
- Fully recyclable machine and hand stretch films for next day delivery
- BRC approved films from manufacture through to storage and distribution
- Convenient call-off order facility for stable and secure film supply

BAGGING & E-COMMERCE SOLUTIONS

Horizontal and vertical baggers for seamless order fulfilment.

An automated bagging process is guaranteed to streamline any packing station or distribution centre, maximising speed, throughput and accuracy whilst slashing labour costs.

Machinery:

Our **vertical bagging units** can be supplied as either desktop or stand alone units dependent on space limitations. Housing integrated thermal transfer printers, these autobaggers deliver **direct high definition on-bag printing**, negating the need for secondary labels.

Their potential **speed** can comfortably match the output of up to as many as ten manual operators whilst delivering a high-quality, secure bag every time. Amongst the range is the **widest bagging unit available**.

YPS also stock a leading collection of **horizontal bagging machines**, proven to make light work of applications that require **increased levels of automation and speed**.

With intelligent print and apply label printers and scanners, these models utilise a 'one-in-one-out' **data retrieval and destroy system**, offering the utmost security, compliance and accuracy. Furthermore, several of the baggers can run **both paper and film**, offering flexibility, future-proofing and greener credentials.

Materials:

An impressive portfolio of materials means that we can cater for almost any e-commerce or pick and pack bagging application, whether you require flexible films, papers or polybags.

Our exceptional **quality shrink films** are 100% recyclable, offer a high shine finish, great machinability and strong, durable seals. Printed films can also be run, offering a great opportunity for enhanced branding.

Alternatively, **coated and uncoated papers** can be supplied in a choice of thicknesses. These fully recyclable papers come in both brown and white specifications and printed designs can also be catered for.

Finally, our **polybag blends** include high clarity LDPE, anti-static, metallised, non-scratch and breathable 'MAP' bags. All are 100% recyclable and can be supplied with or without recycled content in the blend.

To complete your **ideal bag specification**, add features such as easy-tear perforations, hang holes and return closing strips to your choice of colour, thickness and width, as well as custom press printing. Choose from either pre-opened bags on a reel or fan-folded specifications in a carton.

Key Benefits :

- Intelligent bagging machines to suit any speed and automation requirement
- Integrated data banks, labellers, printers and scanners for a secure all-in one solution
- Tabletop and stand alone units to cater for any packing station configuration
- Direct on-bag printing to negate the need for labels
- A choice of fully recyclable films, papers and polybags
- Included service contract with every machine

AWARD-WINNING SERVICE

All-round support that is the foundation of our reputation.

YPS offers **market-leading after-sales support**, delivered by a team of knowledgeable engineers. But doesn't every company claim that? For us, especially as a family business, our reputation truly matters. Delivering on our service promises has always been at the heart of our company and is key to why we've been in business continuously for more than 45 years. So, what do these service promises mean in practice?...

As well as a **comprehensive parts and labour warranty**, we also offer as standard a priority preventative maintenance **service contract free of charge** with the sale of all machines, which is unique in our industry.

All service contract holders are automatically eligible for a **significant discount on all spares** and service work, making them invaluable for a hassle-free wrapping operation. Plus, our service contract scheme provides **regular servicing of your machinery** at intervals that suit you, ensuring that all parts and working mechanisms of your shrink wrapper, pallet wrapper or bagging unit are kept in excellent condition.

We constantly seek to optimise, fine-tune, improve, down-gauge, maintain, repair and refurbish, because we see the installation of a packaging machine as the beginning of a long relationship, not a one-time transaction. That's why whenever you encounter our technical team, whether for operator training sessions, machinery installations, service visits or warranty support, you can be sure that your packaging success is their priority.

"You offered us a very generous service contract included with the machine, which has been invaluable. Your engineers are some of the most highly skilled I've ever used."

Craig Gudgeon, Alpha Feeds

One of the largest teams of directly employed service engineers in the UK

SafeContractor approved

Full operator training

One-to-one contact with your installation engineer

All spare parts are kept in stock at YPS

Quick response to call outs

Convenient servicing schedules

Comprehensive service contracts to ensure your machine is kept in peak condition

Your Packaging Is Our Priority

TRUSTED BY

"We have six lines comprising side sealers, sleeve sealers and tunnels, which are all easy to operate, robust and reliable."

Danny Grainger, BT

"I am delighted with the pallet wrapper. It's transformed our despatch process which is now more efficient and minimised damage to even our very largest products during transportation."

Seamus Hartnett, Xtratherm

"From the moment the first bagger was demonstrated I knew it was the ideal system for our needs. I signed off on the project there and then and we kept the trial machine, ordering a second before the close of the meeting."

Simon Noble, LDL Components Ltd
