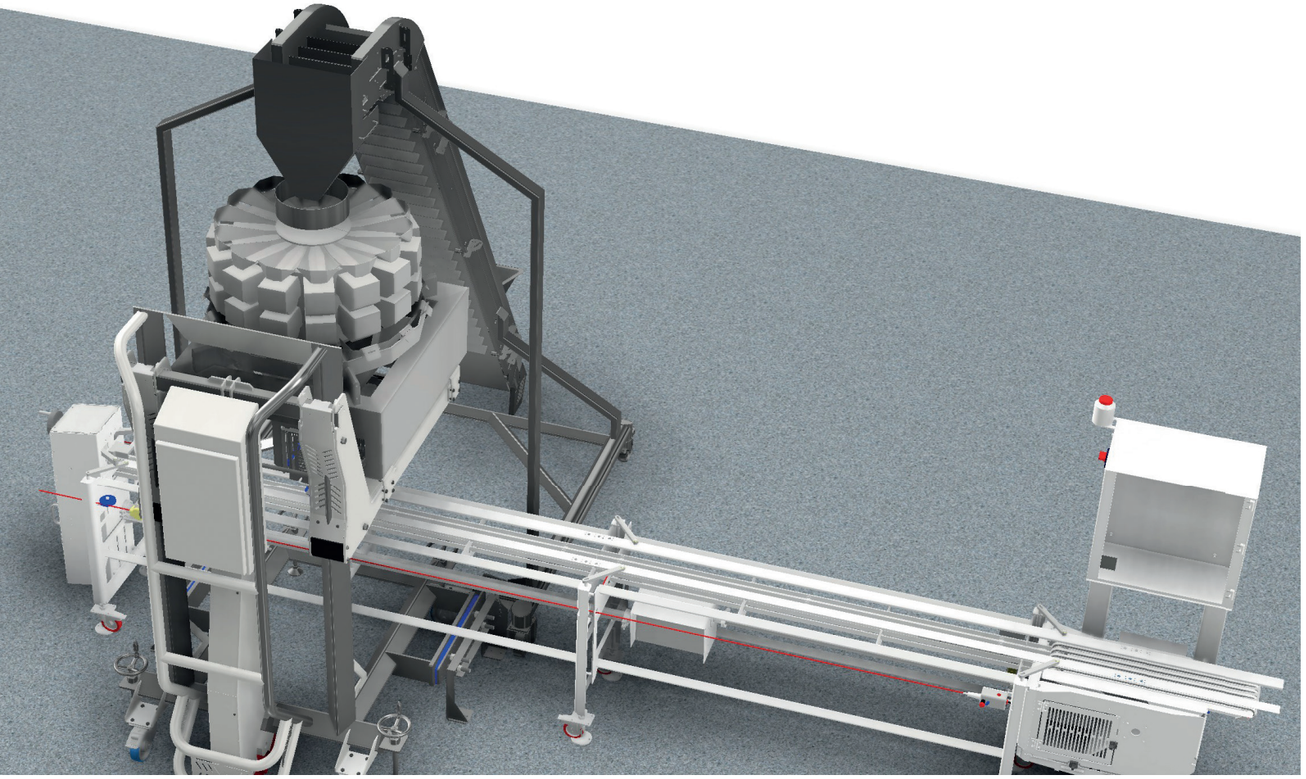
WEIGHING TECHNOLOGY

MOBILE WEIGHER: MORE FLEXIBILITY AND RUNNING TIME IN THE LINE

THE LOW-HEADROOM SOLUTION: MOBILE. PLATFORM-FREE. IP69 HYGIENIC DESIGN.



FLEXIBLE USE.
NO CONVERSIONS.
FAST CLEANING.

Ready-meal and protein companies often work in spatially limited existing facilities with fixed hygiene zones and frequent product changes. This affects cleaning and changeover processes and shortens the available production time.

Efficient solutions must therefore **work in tight layouts and make optimal use of available space** so that modern production remains possible even in existing buildings.

The Mobile Weigher creates **an addition of capacity** here because the system can be used **flexibly** between line points and enables modern processes even **in ranges with low headroom.**

OPTIMIZE EXISTING LINES:
SECURE PRODUCTION TIME.

In daily operations, clear, safe, and quickly executable drains determine economic performance.
The Mobile Weigher creates a connection between economic advantages and ergonomic benefits.

The lowerable cleaning system at floor level gives staff direct access. The MULTIPOND hygienic design enables fast, thorough IP69 cleaning. This reduces daily effort, shortens interruptions, and increases net usable production time.

The Mobile Weigher improves cost structure and plant utilization.

THE MOST IMPORTANT FINANCIAL EFFECTS AT A GLANCE

Lower operating costs, as cleaning and preparation can be done without additional equipment, and labor costs are reduced.

Lower investment costs, thanks to more effective use of existing space and the elimination of raised platforms, utility connections, or structural modifications.

Increased daily output through reduced changeover times and the replacement of stationary systems. Optimized use of capital instead of purchasing new equipment.

YOUR ADVANTAGES IN EVERYDAY PRODUCTION

- **Ensure hygiene & food safety**
  MULTIPOND hygienic design enables quick access and thorough high-care cleaning
- **Increase net production time**
  Floor-level cleaning and servo-defined height positions reduce cleaning and setup times
- **Conserve resources in daily operation**
  MULTIPOND hygienic hesign reduces cleaning effort and lowers resource consumption
- **Increase safety in daily operations**
  Direct access at ground level avoids risky work at height
- **Optimize line flexibility**
  Mobile, compact design allows for variable placement and eliminates the need for structural modifications
- **Protect investments over the entire life cycle**
  Robust stainless steel design and pneumatic-free operation reduce follow-up costs over many years
- **Ensure operational readiness with MULTIPOND Global Service**
  Global MULTIPOND service and long-term parts availability ensure reliable plant operation

On request, MULTIPOND can supply **a complete combination of Mobile Weigher and feed belt.** This reduces planning effort, minimizes technical interfaces, and enables a ready-to-use solution from a single source.

MULTIPOND

WEIGHING TECHNOLOGY

ENGINEERED AND MANUFACTURED IN GERMANY

SINCE 1946

OVER **5,000** WEIGHING SYSTEMS PRODUCED AND INSTALLED

We make every effort to offer our customers from the food and non-food sectors the best possible solution tailored to them each and every time.

POWER TO INNOVATE FOR OVER **80** YEARS

We have a long tradition of developing, producing and distributing top class products for weighing and metering systems.

OVER **450** EMPLOYEES WORLDWIDE

Over 450 highly qualified employees worldwide work to secure our leading position as a technology provider for the fully automated weighing of food and non-food products.

5 SITES

Sales, project planning and service are handled by the headquarters in Germany, by the 4 subsidiaries in France, the Netherlands, the United Kingdom and the USA, and by a global network of agents.
