PRODUCT PORTFOLIO

PRODUCT PORTFOLIO

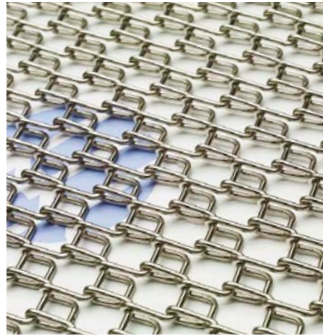

Founded in 1962 Wire Belt Company Limited has a long history of producing steel mesh belting under the Flat-Flex® trade name. Our vision is to become the most preferred, respected, and trusted metal belting company in the world.

Wire Belt has expanded it's product portfolio to offer different styles of metal conveyor belts, conveyors, drive components, and accessories to our customers. Our product offering helps our customers improve their manufacturing processes, increase efficiency and allows them to find suitable solutions to many different applications.

METAL CONVEYOR BELTS

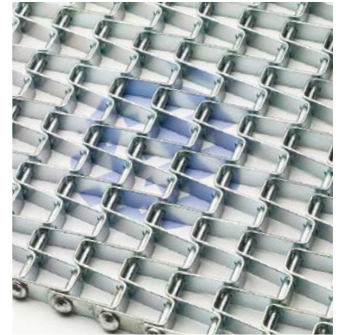

Flat-Flex®
The proven hygienic conveyor belt technology.

Compact-Grid®
Excellent flow through improves production efficiencies.

Eye-Flex®
Heavy-duty metal modular conveyor belt.

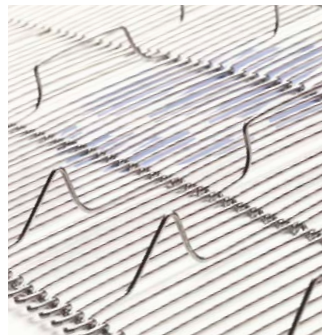

Honeycomb
Durable and open belt design with a high strength to weight ratio.

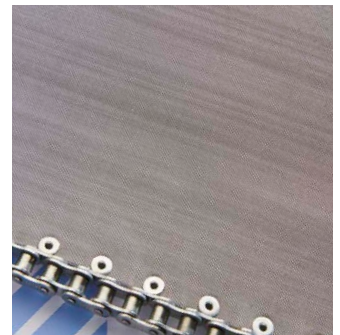

Spiral Woven Belts
Excellent strength to weight ratio.

Ladder-Track™
Open design for efficient operation.

Specialty Belts
For products that require special handling.

Filter Belt
For food fryer filter conveyors and used as support belts for filter paper.

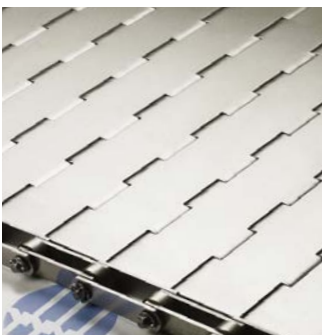

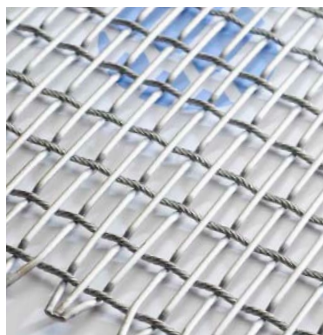

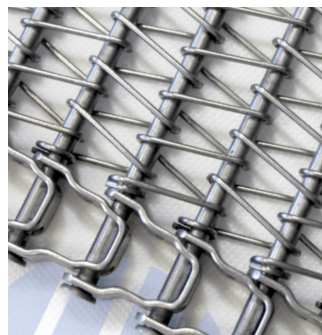

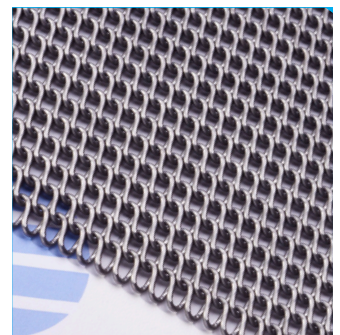

Plate Link Belt
Extremely robust design and high load capacity.

Self Tracking Belt
A very versatile type of belt.

Flexible Rod Belts
Multi-tier spiral conveyor belt.

Rolled Baking Band
A belt of low mass, high strength with good air circulation.

CONVEYORS

Ladder-Flex™ Conveyors
Spreading, converging and diverging conveyors.

Flex-Turn® Conveyors
Compact design solves tight production line space problems.

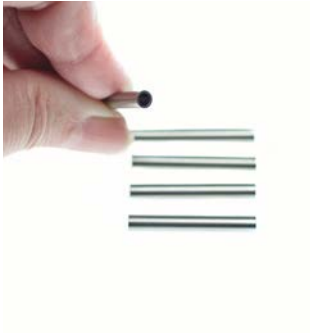

Straight Conveyors
Custom designed to ensure efficient operation.

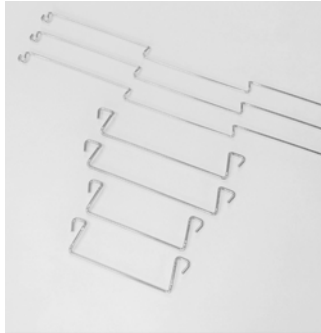

ACCESSORIES

EZ-Splice®
Joining Strand
Longer belt life, stronger belt joins.

Belt Joining Tubes
Create a hybrid join between a full strand weave and the use of joining clips.

Belt Joining Clips
Available in one space and three space units.

Tools
Belt maintenance tools for removal, repair and installation of metal belts

DRIVE COMPONENTS

PEEK Components
High performance drive components.

Clean-Sweep™ Sprockets
Deflect build up and lengthen life.

Drive Components
Keeping your lines running.

SERVICE & SUPPORT

Product Support
On-site or remote support for belt & conveyor issues.

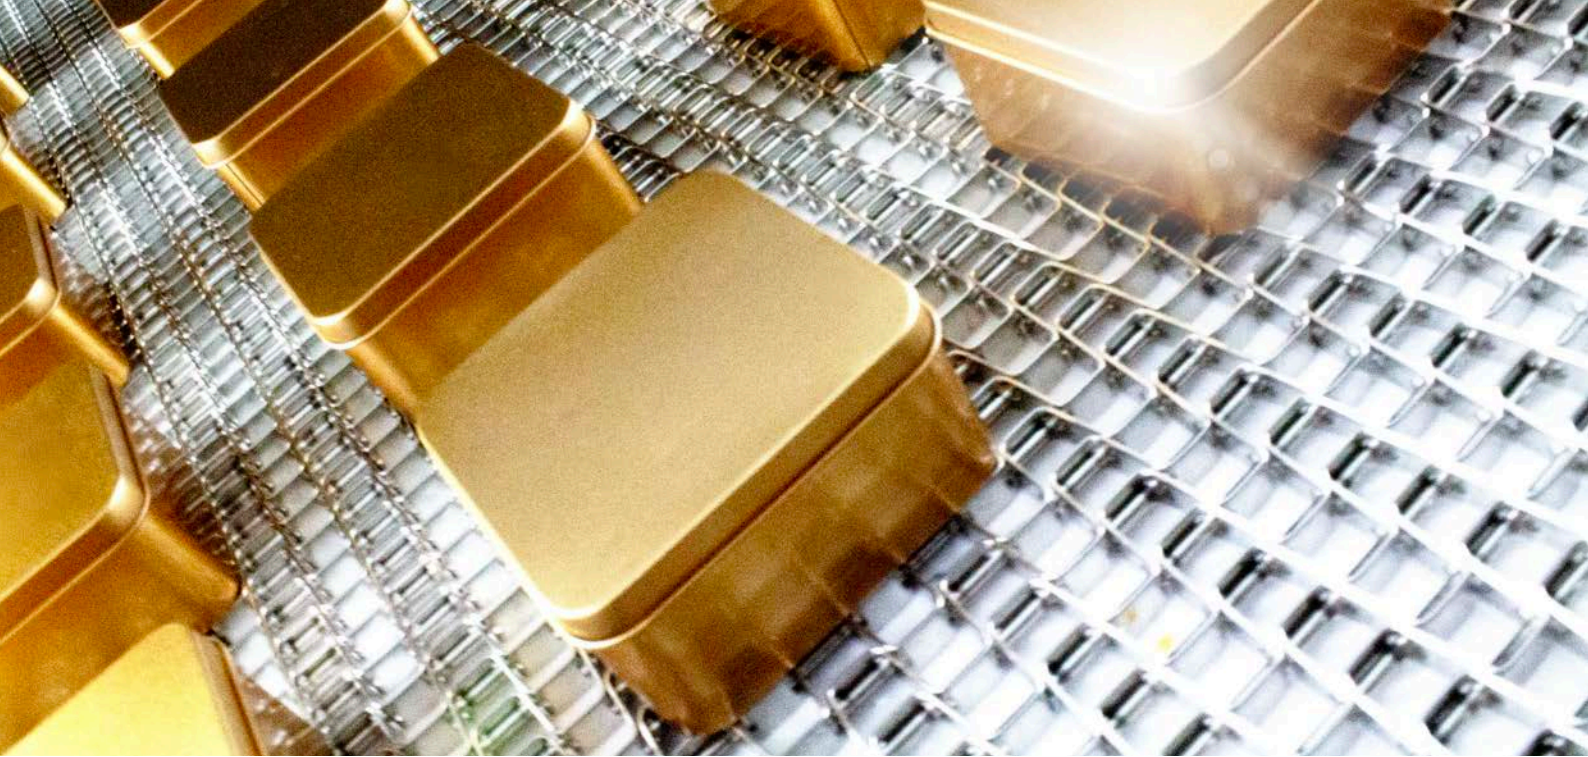

Belt Survey
Identify belts being used to reduce downtime and ease reordering.

Stacking Solutions
Solve stocking requirements to prioritise cash flow.

Training
Get the best operational life from your conveyor belt.
