**Packaging with ALPMA**

# It's a small world...

Subsidiaries:

FRANCE  
GREAT BRITAIN  
RUSSIA  
SPAIN

## Quality has no limits.

Throughout the world, ALPMA is involved in all aspects of packaging and cutting, using its expertise to meet challenges on the spot.

As part of a global communications network, and with long-standing partners in more than fifty countries, it provides its customers with rapid answers and comprehensive service.

In the divisions Processing Technology, Cheese Production Technology and Cutting and Packaging Technology, being close to the customer is not just an obligation, it is a matter of choice.

ALPMA is represented in the following countries:

ALGERIA • ARGENTINA • AUSTRALIA • AUSTRIA  
BRAZIL • CANADA • CHILE • COLOMBIA  
COSTA RICA • CROATIA • CZECH REPUBLIC  
DENMARK • EGYPT • ESTONIA • FINLAND  
FRANCE • GREECE • HUNGARY • INDIA • IRAN

IRELAND • ISRAEL • ITALY • JAPAN • JORDAN  
LATVIA • LITHUANIA • MEXICO • NEW ZEALAND  
NORWAY • POLAND • PORTUGAL • RUSSIA  
SLOVAKIA • SLOVENIA • SOUTH AFRICA  
SOUTH KOREA • SPAIN • SWEDEN • SWITZERLAND  
THE NETHERLANDS • TURKEY • UNITED KINGDOM • USA • VENEZUELA

...and a beautiful one.

Let your high-quality product take the high road to success.

Quality packaging increases appreciation of the product. Whether it's foodstuffs, an article as soft as butter or as hard as steel, round or square, there are no limits to the shapes, qualities, and consistencies that can be wrapped. The expert and comprehensive ALPMA packaging philosophy provides just the right solution.

During more than sixty years in which we have been developing machines for fold wrapping, our systems have reached the highest quality.

With ALPMA machines, you can package your products completely hygienically and precisely, but economically as well – just as you would wish.

What makes a star out of your product on the shelf?

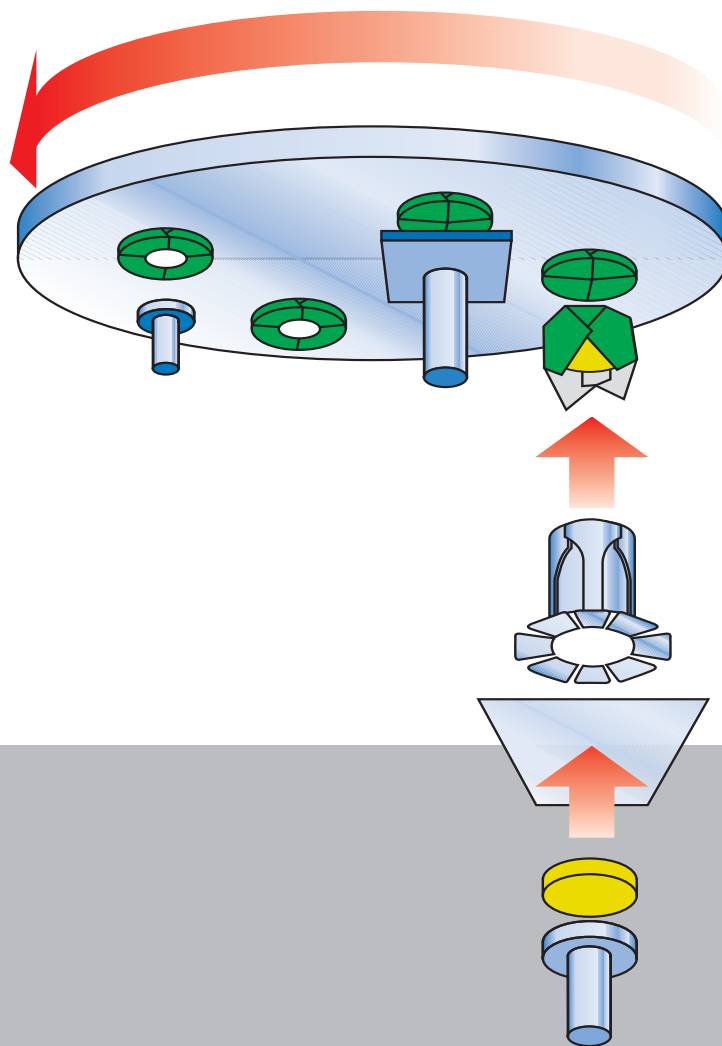

**A masterpiece deserves elegant packaging.**

You will have taken infinite pains to bring your product to fruition. Quality packaging will ensure that its intrinsic worth is revealed externally. This is what the skill of the ALPMA packaging artist is designed to do.

Care is the main principle here. Using small amounts of material brings economic advantages, and brings ecological benefits as well.

One of the secrets of ALPMA's success is its ability to recognise forward-looking market developments, and to ensure that they are implemented in a way that is technically perfect.

*Sixty years ago or today...*

*...ALPMA machines always represent the latest technology.*

# We cover everything.

Whether food or non-food, up to the size of a coconut.

We have developed the ALPMA SAN series to ensure that your products make a big impact. It is a well-thought-out concept, ranging from the entry-level model to the fully automated packaging line.

A wide range of shapes, formats, and consistencies can be packaged economically in machineable films – in spite of the varying dimensions normally found in natural products.

If your product is smaller than a coconut, you will find the solution you need on the next four pages. And for anything larger, please turn to page 13.

## Fold wrapping for

### Format range:

Round  $\varnothing$  Up to 140 mm

or:

Height Up to 75 mm

Length Up to 140 mm

Width Up to 100 mm

### Foil range:

Length Up to 350 mm

Width Up to 350 mm

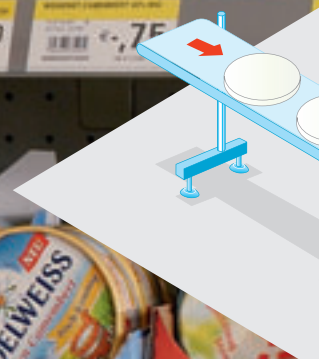

### Performance range:

Packages/hr 3,000–9,000

# Love at first sight!

Pleat wrapping for round and spherical products.

Display packaging – greater protection for the product and more space for information.

Sour-milk cheese, collated and wrapped as a roll.

**Your productivity is our concern.**

The SAN 60 series minimises the unproductive phase. Extremely short changeover times, with flexible and rapid conversion to a wide range of product shapes and sizes, mean that the machine availability time is very impressive.

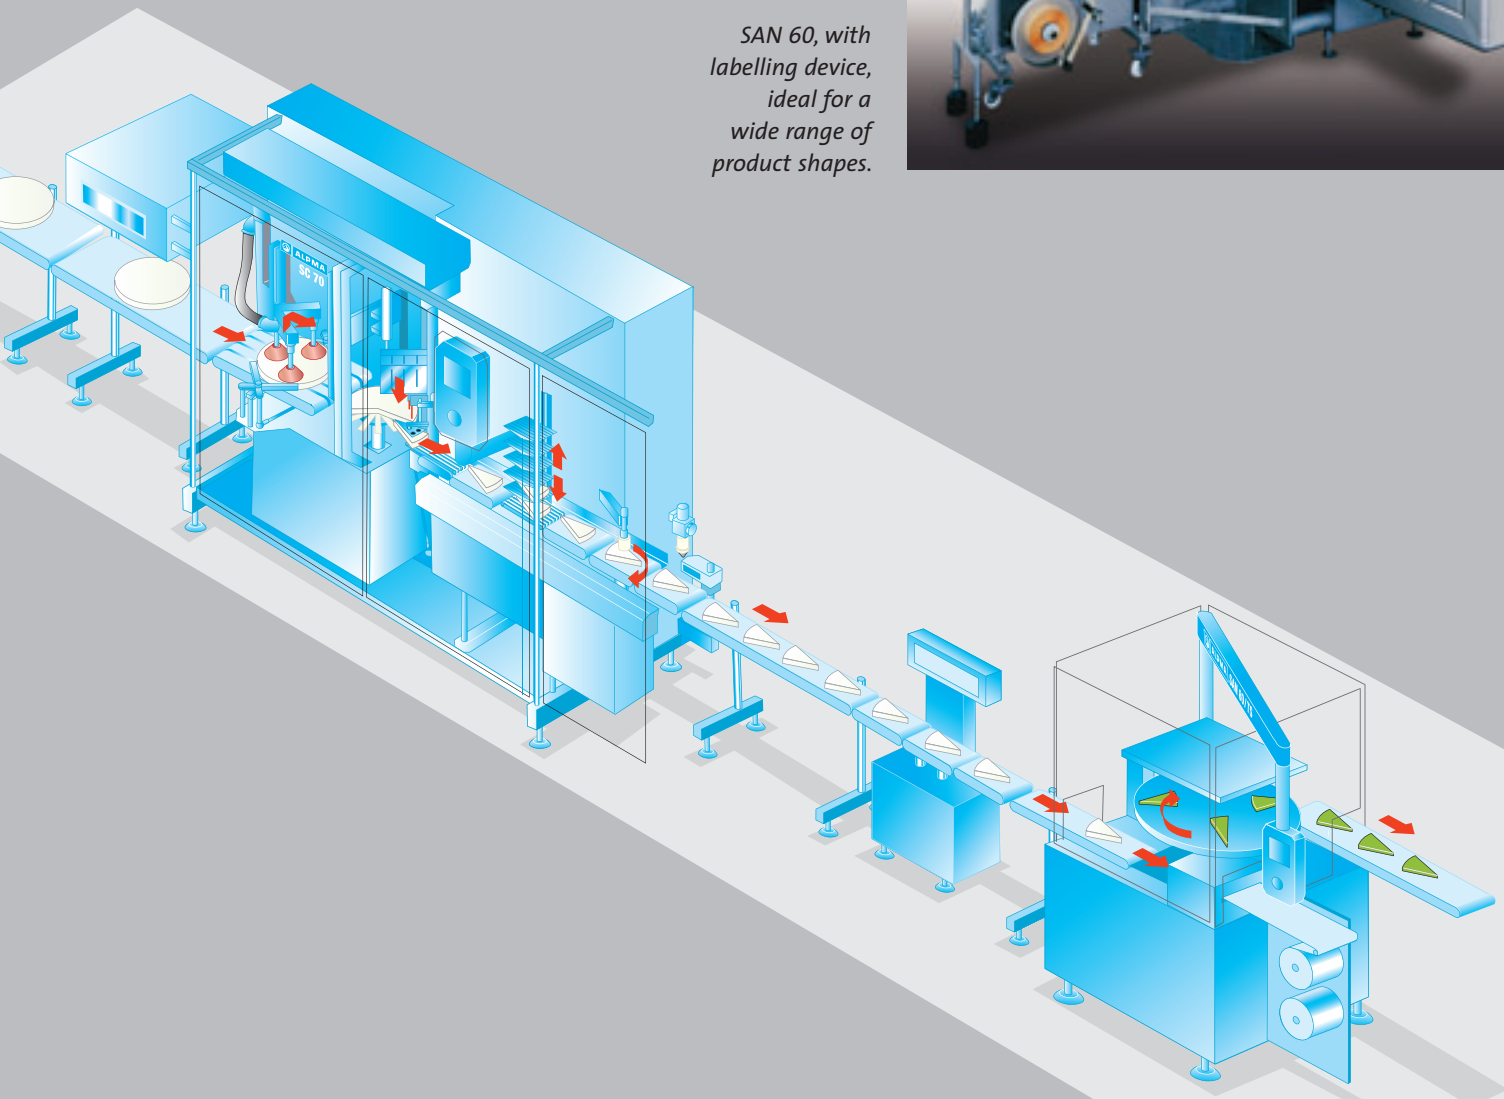

Because of its vertical operating mode, our entry-level model, the SAN 60/V, is ideal for use both as an individual machine and for integrating into a fully automated packaging line.

To meet your individual product packaging requirements, ALPMA machines provide a wide range of options for packaging your goods in a way that is both representable and effective.

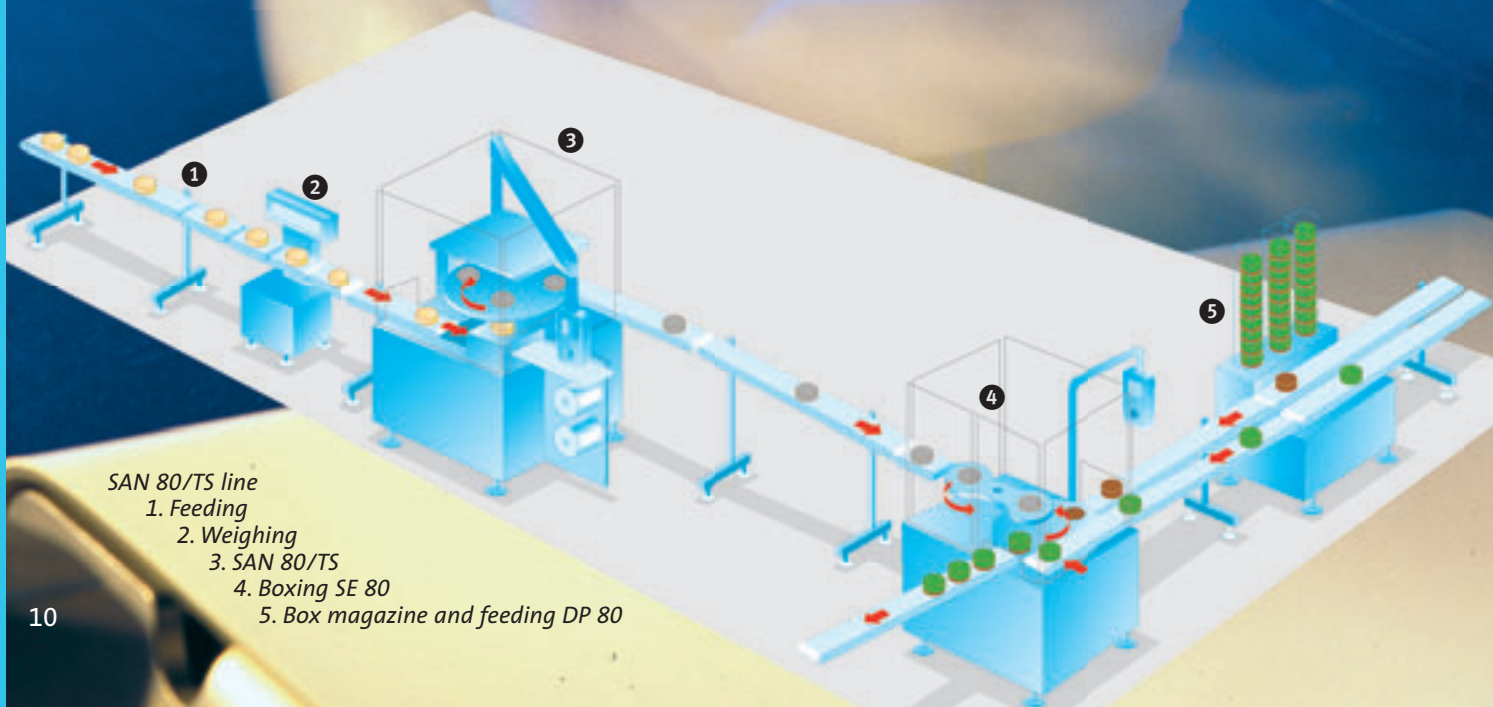

*SAN 60/V – for optimum automation in complete lines.*

*SAN 60, with labelling device, ideal for a wide range of product shapes.*

# Packaging performance.

SAN 80/TS line

1. Feeding

2. Weighing

3. SAN 80/TS

4. Boxing SE 80

5. Box magazine and feeding DP 80

**So that you can think today  
about your success tomorrow:**

An astounding eighty packages a minute can easily be achieved with the SAN 80 series, even when dealing with goods that are as soft as butter.

Because no two natural products are exactly alike – any two eggs, for instance – the SAN 80/TS, with its adjustable format, is designed to handle product tolerances of up to 15 mm.

And as for tomorrow: Additional devices for sealing in freshness, advertising labels, perforations, or coding can be added later.

*SAN 80/TS – high-performance packaging:  
80 packs per minute.*

*Machines like the RT 6000 combine the tasks of dividing up and packaging.*

*The SAN 80/WK model is specially designed to cope with soft products.*

# Now you are playing in the Champions League.

You have a clear idea of the ideal packaging for your product.

As your expert partner, we help you to put your ideas into practice, and we develop suitable so-

lutions for all shapes and consistencies, even for products of large weight and size.

ALPMA machines for fold wrapping can handle whole

Bries, hard cheeses the size of cartwheels, and Edams the size of footballs.

Pass the ball to ALPMA.

Fold wrapping for

**Format ranges:**

Round  $\emptyset$  Up to 380 mm  
or:

Height Up to 175 mm  
Length Up to 360 mm  
Width Up to 280 mm

**Foil range:**

Length Up to 1,050 mm  
Width Up to 800 mm

**Performance range:**

Packages/hr Up to 2,500

A brand launch that reveals all.

**Large weights and format sizes need powerful solutions.**

Our “jumbos” have appropriate formats to help you deal with heavy and large articles. This makes them superior and reliable.

*SAN 20/V – precise folding for large formats.*

For instance, large precut pieces can be displayed on the cheese counter in a protective wrapping, which serves well as point of sale presentation wrapping.

*SAN 40/V – so the heavyweights and the big fellows show up in the right outfit.*

*VT 60 – so that even small production quantities turn a profit.*

**Giving extras increases the delight.**

*Dressed to the nines – the spectacular brand image.*

*The label – your seal of authenticity.*

*SE 80 – automatically packs products into boxes. And, of course, it can be used as part of a complete line.*

**Make your product the star on the shelf!**

Numerous tests have shown that attractive packaging can promote sales.

A whole range of attractive solutions – such as wood, cardboard, plastic containers, banderoles, etc. – help to make your brand stand out from the others, and encourage the customer to choose it instead of other products.

And, by the way, we have created space for you to enter further product and customer information, such as EAN codes. A label serves as a seal of authenticity.

*DP 80 – box magazine and feeder.*

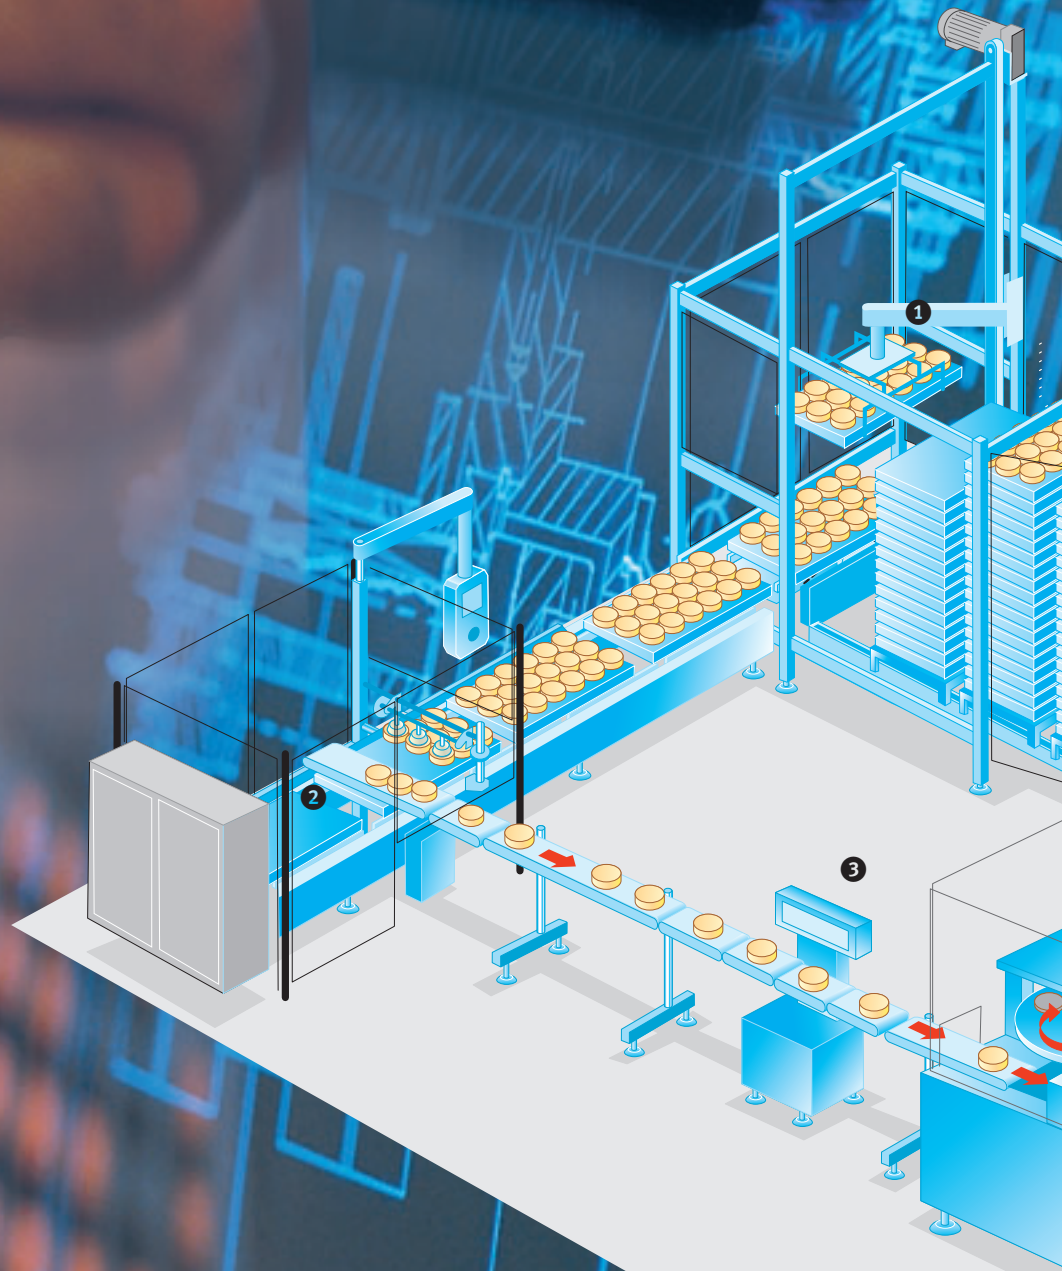

*SE 60 – product packaging with integrated box storage, the lean alternative.*

*Boxing – half or whole, the decision is yours.*

Success throughout the whole line.

**Give shape to your ideas with ALPMA.**

The development and implementation of your ideal product packaging are accurately coordinated with your ideas and requirements.

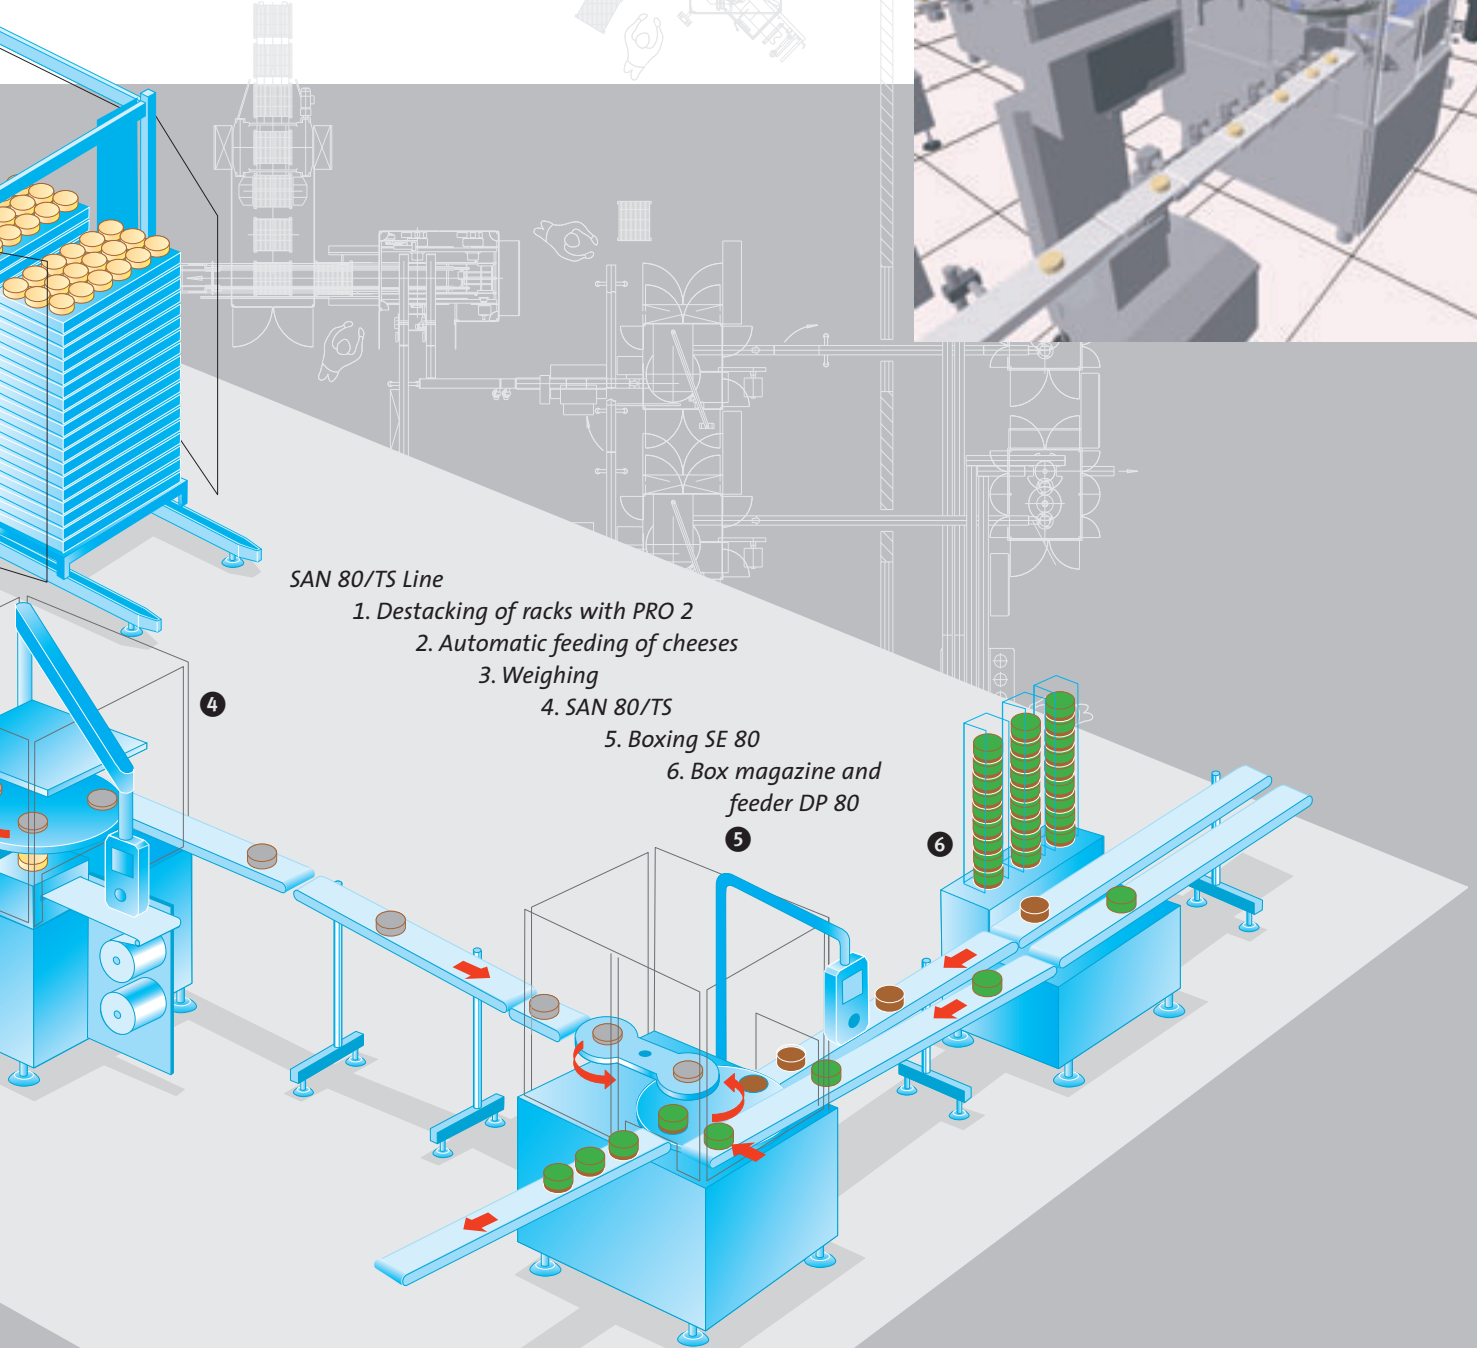

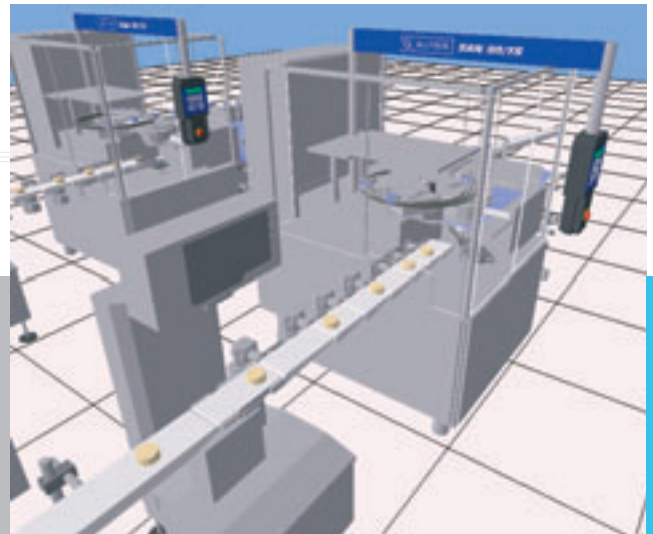

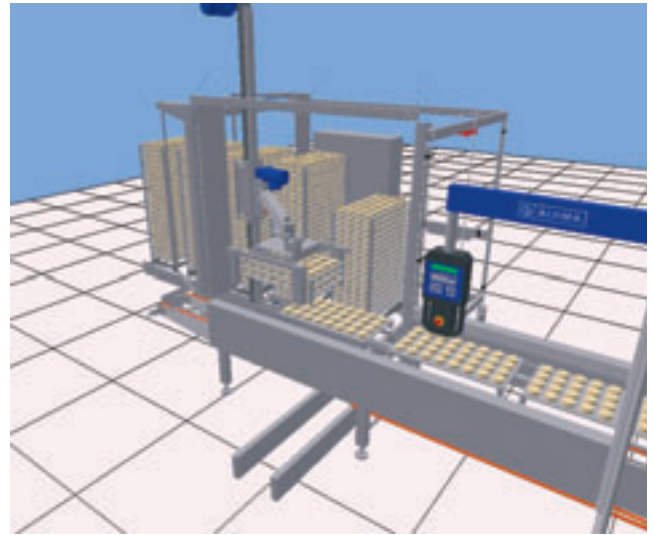

Thanks to the latest technology, close contact between you and our project teams ensures that the highest standards can be achieved.

Computer simulation of production provides three-dimensional transparency in real time. This gives you a clear picture of what's what on your line.

As a result, any weak points in the line as a whole will be sorted out in good time and prior to construction. We also take responsibility for integrating components from other manufacturers into the line. Whether it is a matter of training, maintenance, or repairs, ALPMA is there. Any time anywhere.

**Take us at our word.**

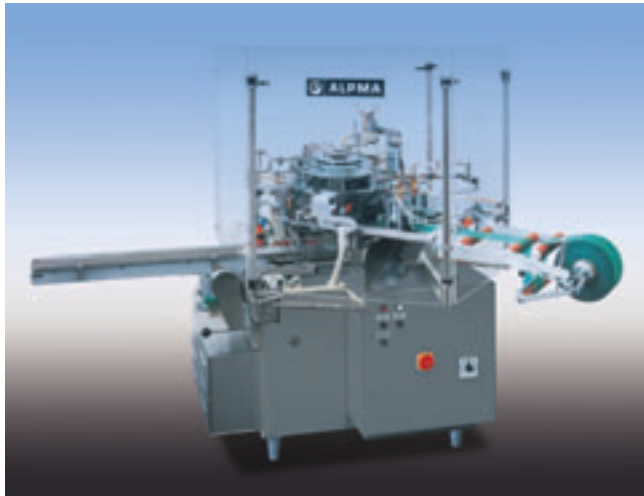

*Production processes are simulated on the computer.*

*SAN 80/TS Line*

1. Destacking of racks with PRO 2
2. Automatic feeding of cheeses
3. Weighing
4. SAN 80/TS
5. Boxing SE 80
6. Box magazine and feeder DP 80

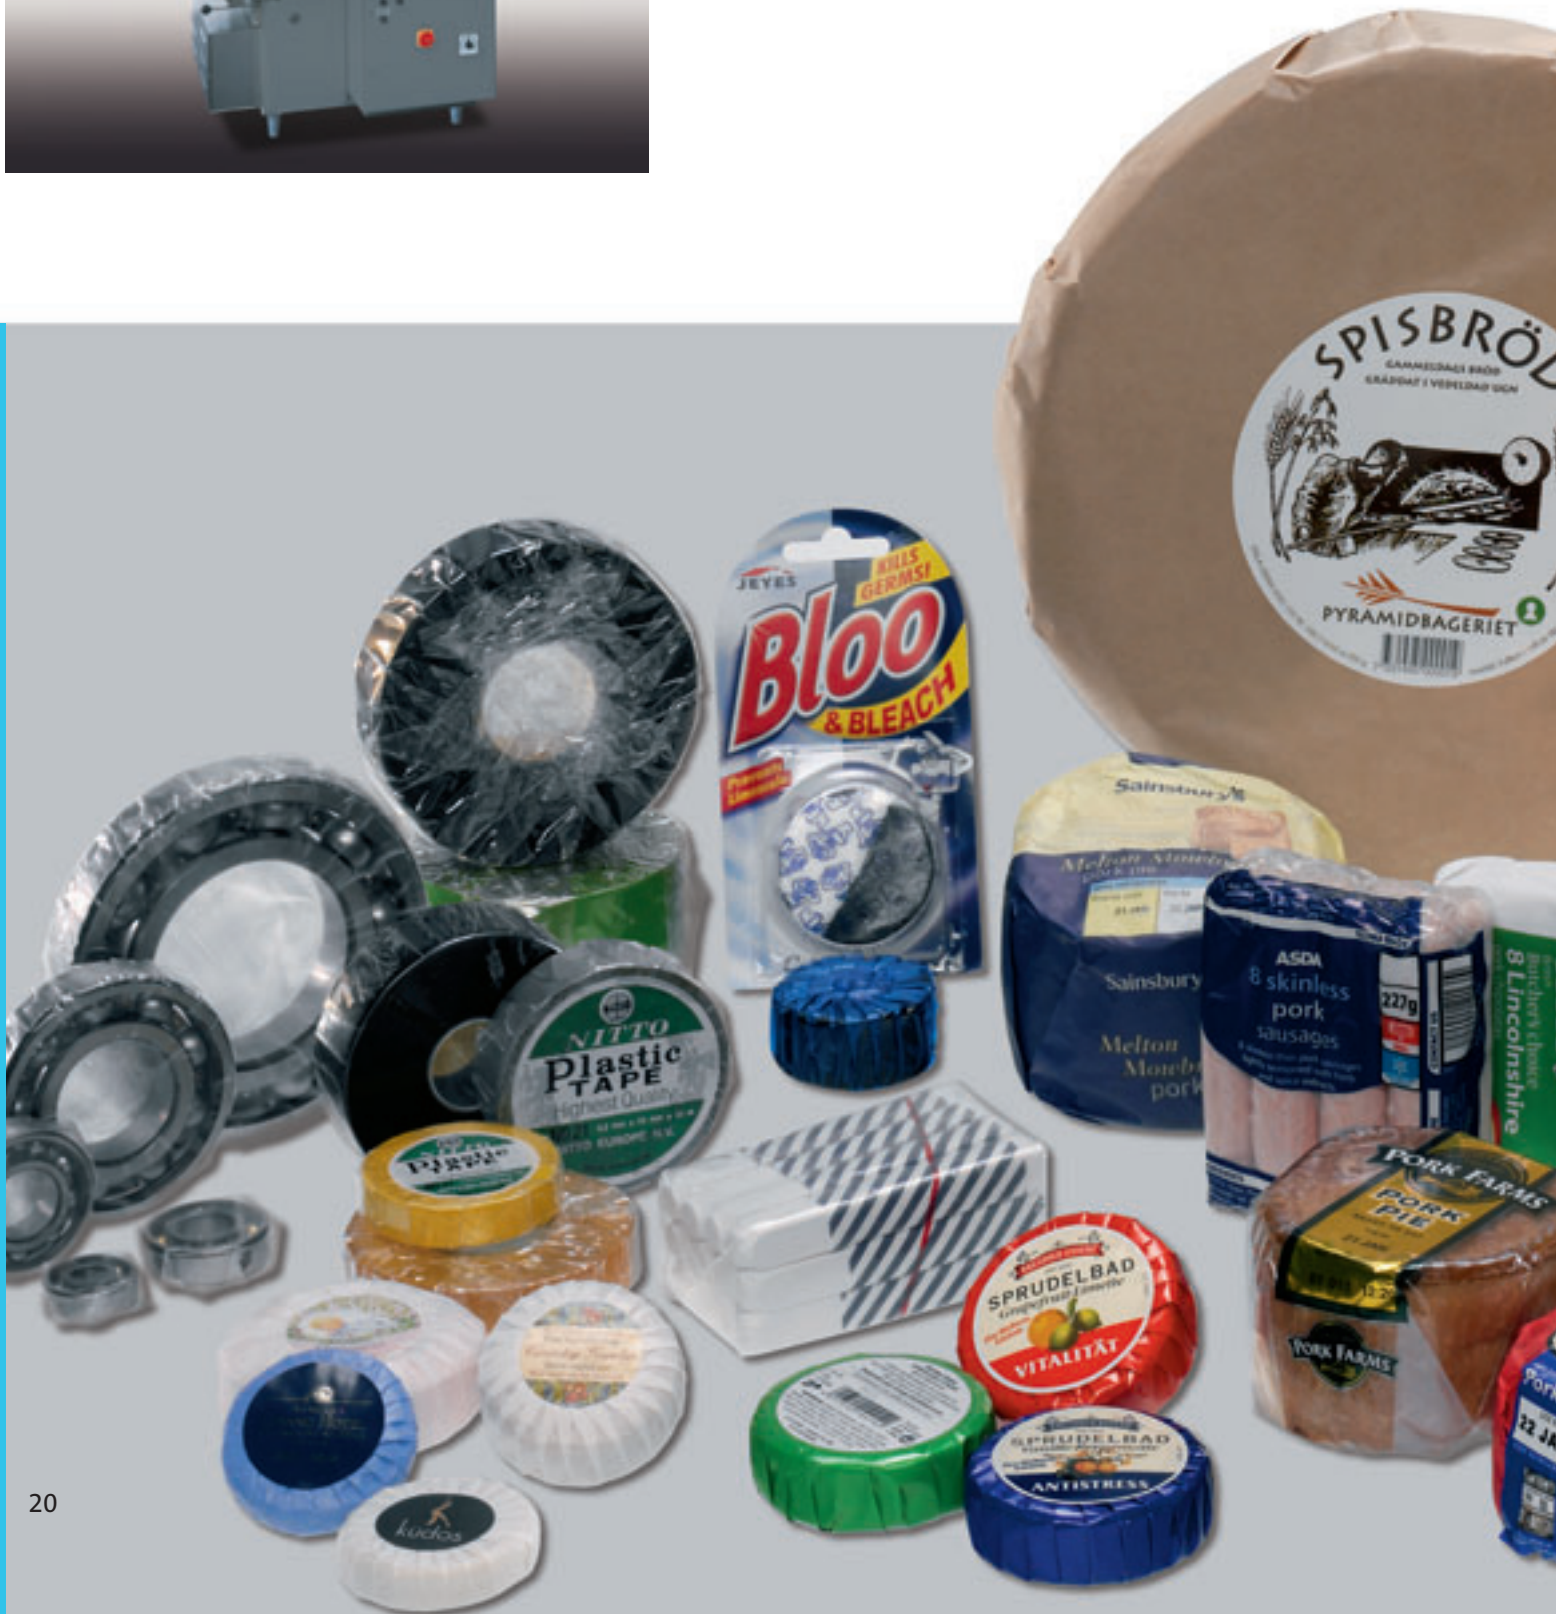

# It's not just cheese.

V 64/ASch II –  
Pleat packaging:  
classically  
beautifully,  
allows your  
products to  
shine.

**Traditional – like hand-  
wrapped.**

We think of packaging as  
revelation, not concealment.  
The intrinsic values become  
visible even from the outside.

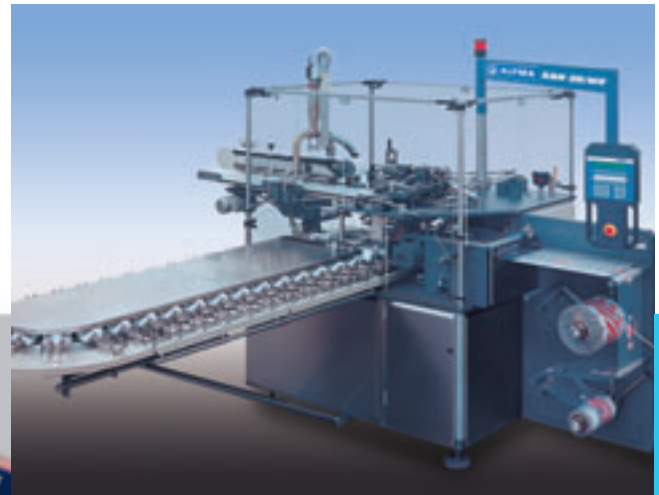

VT 60 – ball  
packaging – a well-  
rounded affair.

Wraparound packaging  
provides outstanding and  
low-cost product protection,  
whether you have foods of  
any kind or pleasantly fra-  
grant bath salts tablets and  
other technical items.

If you want your premium  
products to reflect traditional  
aspects, your choice of ALPMA  
fold packaging will have  
you right in line with  
the latest trends.

SAN 80/WK –  
traditional fresh look,  
like hand-packed.

# Service

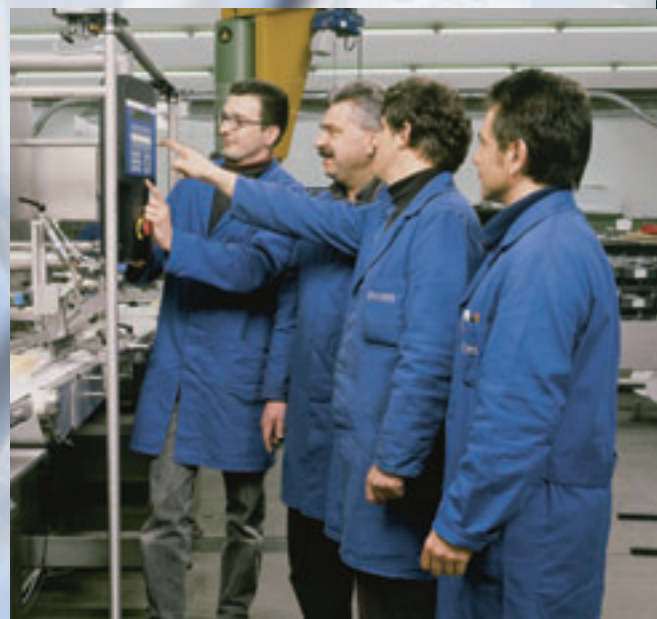

**Be on the spot. Keep the channels open so that information can flow freely, and carry out constant evaluation. Gain experience, and incorporate it into the development of your machines.**

Individual customer training courses in various languages are held in the ALPMA Training Centre. These are designed to ensure maximum productivity of your machines and to improve communication between you and ALPMA.

You benefit from our ever increasing expertise. This is passed on through training of your staff as with the training of our project engineers and service specialists.

Comprehensive documentation in the relevant national language rounds off the ALPMA service package. For, after all, in the long run any machine is only as good as the service it gets.

**Everything revolves around your success!**

# Service

All-round support.

By providing comprehensive on-the-spot support worldwide, the Service Department brings everything together, ensuring that production goes smoothly and that operations are not interrupted.

Remote digital diagnoses via modem, together with the latest communications technology, are components that make it possible for your tightly knit network of service partners to respond immediately. Providing remedies as fast as possible in the event of breakdowns is fundamental, which demands, of course, high stocks of readily available spare parts.

A high standard of service also means, however, carrying out intensive servicing at regular intervals, recognising in good time when parts are wearing out, and replacing them to prevent further trouble later. For, after all, in the long run any machine is only as good as the service it gets.

Everything revolves around your success!
