A DURAVANT COMPANY

Mespack is an international manufacturer of flexible packaging machinery that is committed to developing innovative equipment for sustainable packaging solutions

- Mespack's Industry 4.0 digital control suite platform Mespack Athena™ is installed on all new machines to maximise machine performance, efficiency and production - for better decision making
- Mespack has the largest product portfolio in the industry, offering solutions for:
 - Horizontal and vertical equipment for the production of sachet, stick packs and pouches (FFS/Premade)
 - Water Soluable pods
 - Case packing & end of line
- All machines are suitable for:
 - Liquids and pastes
 - Granules
 - Powders and solids
- Optional equipment includes reclosable features and innovative pack design
- Turnkey solutions

A DURAVANT COMPANY

Vertical MS Series

UET Bernd Siebler are manufacturers of vertical compact cartoning machines. They are renowned for their small footprint, and are available in semi-automatic and automatic model options

- UET's machinery offers true adaptability and flexibility with their 'Compact' range. Based on a rotary system, using their patented unique STELLA 68™ fully adjustable star wheel
- Key benefits include:
 - Short changeover times
 - Large format carton size range
 - Product sensor
 - Centrally adjustable, simple design
 - Up to 4 filling stations
 - Low maintenance
- Additional options available:
 - Automatic leaflet inserter
 - Coding equipment
 - Pharma code reading
 - Track & Trace with multifunctional cameras
 - Grouping table & more
 - Available in Pharma version
- Specific adaptations can be considered on a case by case basis

tkmatik

TKMATIK are specialist manufacturers of liquid filling line machinery. They design and develop modern, universal solutions to meet the versatile demands of production facilities, offering complete flexibility in production with fast changeovers

- Output speeds of up to 55ppm can be achieved with up to 4 servo driven adaptive dispensers
- Machines have inbuilt weight control with feedback to dispensers for automatic dose correction and regulation
- Industry 4.0 digitalisation and inbuilt cameras provide analytical possibilities, remote online support, production tracking and trouble-shooting
- Patented puck system with integrated RFID tags handle and track plastic or glass bottles and jars of varying shapes and sizes through manufacturing process.
- Integrated capping heads accommodate a wide range of closures including: fliptops, disk tops, pumps, atomisers, caps and push-in closures with replaceable heads
- Suitable for liquids of different viscosities including water based, lotions, oils, shampoos and thick scrubs with salts/sand/shell content

**Acer Machinery Solutions Ltd is an established
Packaging Machinery business,
with 20+ years of industry experience.
We supply equipment from single machines
to full turnkey solutions**

Acer Machinery is the sole appointed UK and Ireland representative of industry leading, globally respected manufacturers:

- Mespack, a Duravant company
- UET Bernd Siebler
- TKMATIK

Our services:

- Machine and equipment sales
- Aftersales support services
- Supply of spare parts
- Service and maintenance support
