Automate UK – Robot Integrator Standard

What is the Automate UK Robot Integrator Standard

Automate UK's Robot Integrator Standard is the benchmark to evaluate UK robot integrators' ability to create and produce quality robot projects, solutions and services that fulfil the needs of the UK's robot users. Automate UK has developed this standard alongside BARA (British Automation and Robot Association) and the experience provided by its members, making it a peer reviewed, and agreed standard.

What does it mean to be an Automate UK certified Robot Integrator

Receiving certification from Automate UK ensures that designated robot integrators have businesses that operate at the highest level in the country with good processes to ensure that they have the knowledge and capability to deliver robotic products, systems and services that are safe, reliable and of the highest quality.

How do you become a certified Robot Integrator?

Apply to become certified with the Automate UK Robot Integrator standard HERE
